AP U.S. Government and Politics Curriculum Framework - Practice 3

Analyze and interpret quantitative data represented in tables, charts, graphs, maps, and infographics

Data Analysis

3.a. Describe the data presented

3.b. Describe patterns and trends in data

3.c. Explain patterns and trends in data to draw conclusions

3.d. Explain what the data imply or illustrate about political principles, institutions, processes, policies, and behaviors

3.e. Explain possible limitations of the data provided

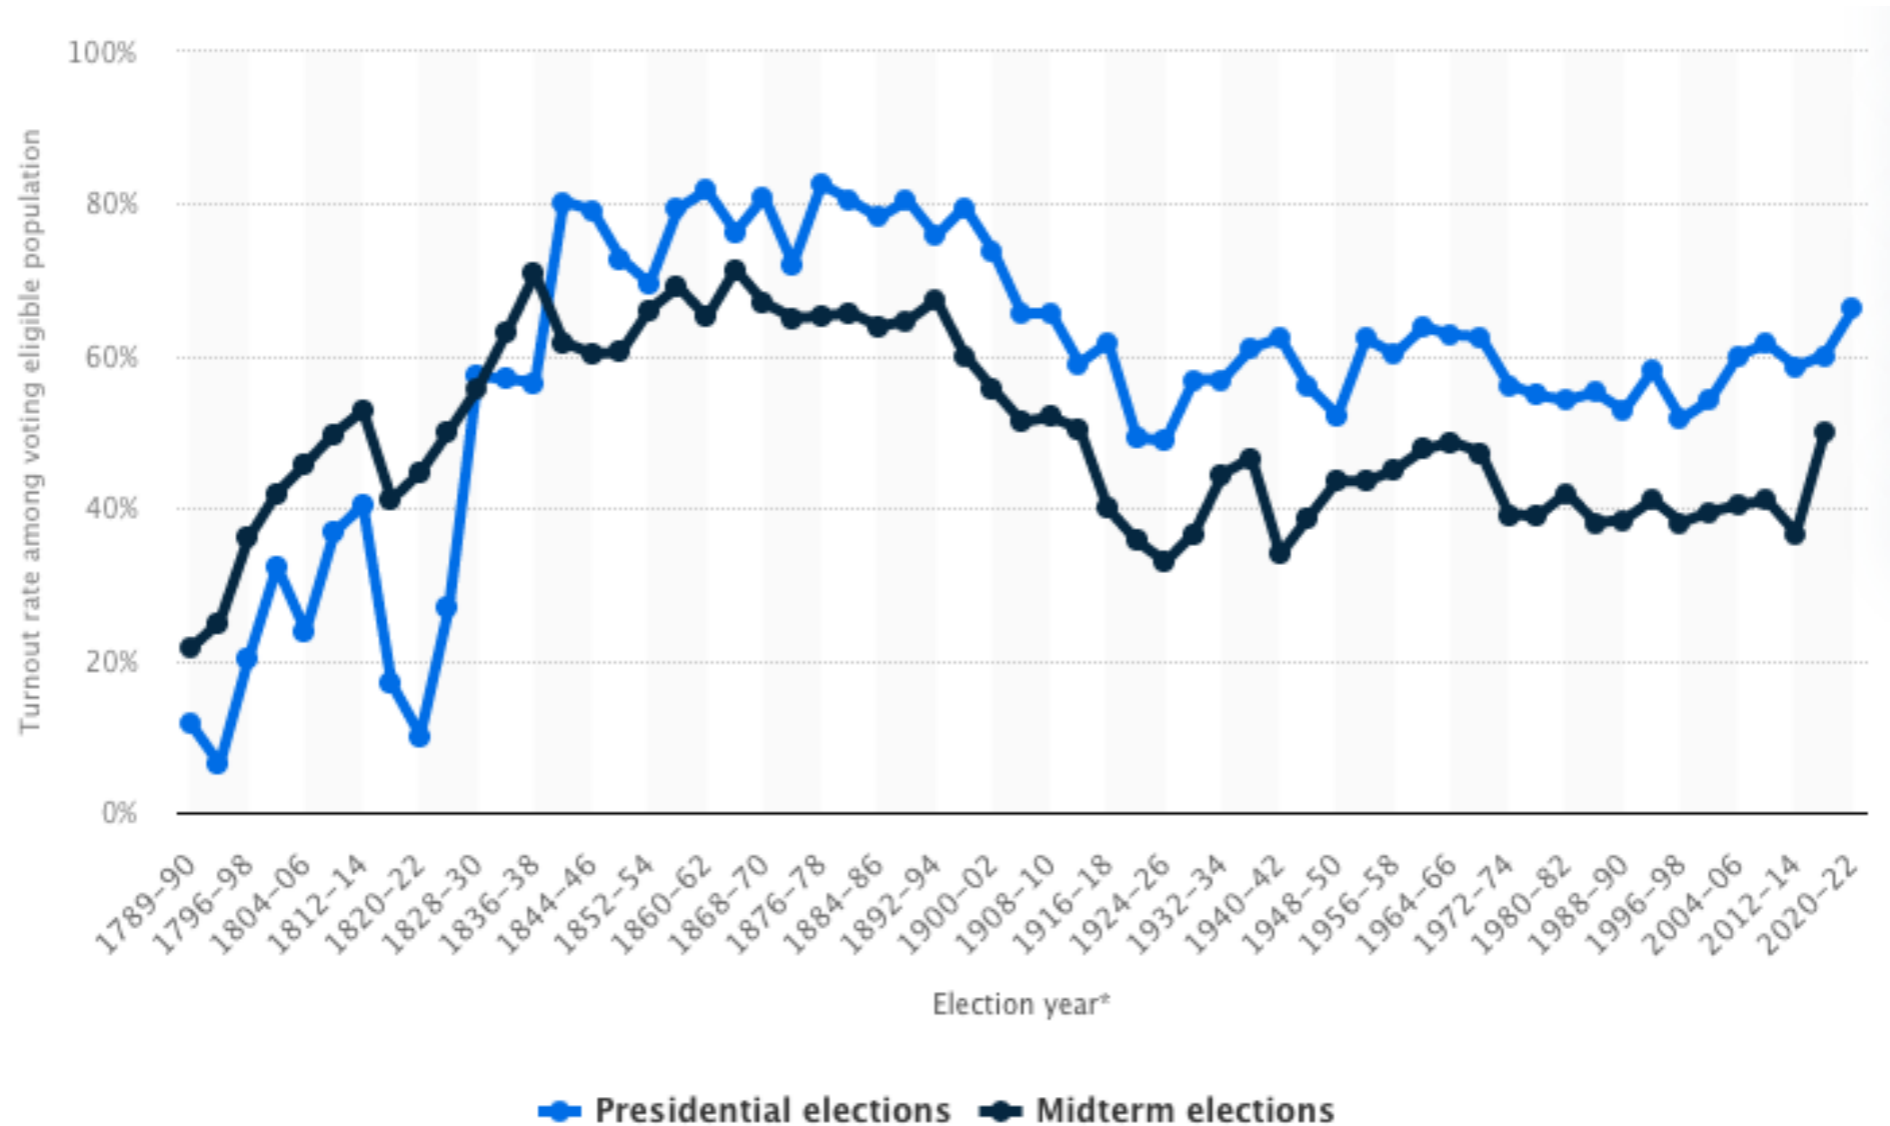

3.f. Explain possible limitations of the visual representation of the data provided

Drawing Conclusions from the Midterm Election

The election did not signify a realignment of voters.

A “red wave” did not sweep the nation.

Republicans won 222 seats, to gain majority control.

Democrats held 51 seats in the Senate, retaining control.

The result is divided government.

If these patterns hold, the 2024 presidential election will depend on voter turnout among key demographic groups:

- 18-39 year-old voters
- Latino and African American voters
- College educated female voters
- Non-college educated, white male voters

Quantitative Free Response Question

Which of the following best describes the area where you live?

	SHARE	VOTED DEMOCRATIC	CHG. FROM 2018	VOTED REPUBLICAN	CHG. FROM 2018	OTHER VOTES
Urban	21%	63%	-6	34%	5	3%
Suburban	45	49	-6	48	4	3
Small town	16	38	-7	59	6	4
Rural	19	30	-8	67	7	3

Quantitative Free Response Question

Use the table to answer the questions.

- A. Identify the community with the highest percentage of support for the Republican Party in the 2022 elections
- B. Describe a trend in the data from 2018 to 2022.
- C. Draw a conclusion about how the trend you described in Part B might impact the campaign strategies of political parties.
- D. Explain how the data might impact the outcome of the presidential election in the Electoral College in 2024.

Resources for Teachers

The following sites have easily accessible quantitative data:
